

Aspidistra elatior

Aspidistra

**It has Earned the Name
'Cast Iron Plant'
due to its Toughness
in the Interior**

- Tolerates 50 foot candles — among the lowest minimum light requirements of foliage plants.
- More leaves per pot for a fuller plant
- Drip fertigation provides cleaner leaves, making it job-ready and retail-friendly
- Long, wide dark-green leaves that begin just above the soil line

14" Aspidistra

Care Instructions

LIGHT: 50 to 150 ft. candles.

WATER: Keep soil barely moist, water conservatively, especially in the winter.

FERTILIZE: Feed every 3 to 4 months with 1 teaspoon of a water soluble 20-20-20 and 1/2 tsp of Epson salts per gallon of water.

TEMPERATURE: Maintain temperatures above 50°f.

*Aspidistra elatior is
an excellent low-maintenance
plant for all interior or
well-shaded conditions*
