

Bromeliad

THE Neoregelia Collection

- The first three in a series of Neoregelia trials from Kraft Gardens
- Brilliant colors to choose from — a deep red, a vibrant orange and a hot pink
- Unlike other Neoregelia, their color extends beyond the center to the outer edges of the plant
- Color is visible from all angles without having to tilt them
- Looks great as a stand-alone, in groupings, or in underplantings

CARE INSTRUCTIONS

LIGHT: Neoregelia tolerate a variety of light levels. 200 ft candles and above would be best.

WATER: As with most indoor plants, do not over water but keep roots moist. Fresh water in the center cup, but do not allow it to get stagnant or cold.

FERTILIZER: Not required for the short term.

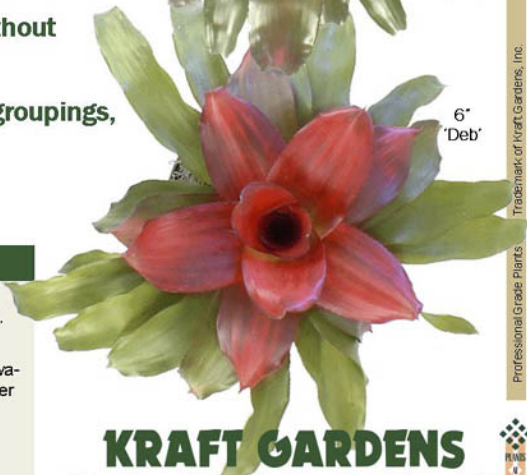

TEMPERATURE: 50° to 90°
