

Dracaena

Marginata Cut Back

- Continuously Shade Grown Resulting in soft, Shiny, Green Foliage
- Canes are Planted at Staggered Heights
- Each Cut Back Cane Has Multiple Shoots
- Straight Canes Provide Columnar Shape

The Growing Process

Kraft Marginatas are grown specifically for the professional interior landscaper. Our Marginata cane is flown in from Costa Rica, where the cane has been prepared by stripping all the leaves in the field waiting

for calluses and sprouts to develop. After the cane is potted at Kraft, all leaves are continuously grown in shade. This growing process results in perfectly acclimated Marginatas ready for indoor use.
