

Ficus Amstel Mini Braid

AMSTEL MINI BRAIDS are now grown in our new State-of-the-Art shade houses. These shade houses have dual moving shade curtains which control light, humidity, and temperature, creating a stress-free environment. The moving shade systems provide ideal lighting for acclimatization. The results are tighter leaf internodes and wider leaves, creating a fuller plant. Amstel Mini Braids are all hand-trimmed by professional growers assuring uniformed sizes and shapes. The growers sanitize their clippers to insure that no diseases are ever transmitted between plants.

AMSTEL MINI BRAIDS are continuously grown and fed with our computerized fertigation drip system, which gives the plant clean glossy leaves so you don't have to clean them before putting them on the job.

AMSTEL MINI BRAIDS are potted in hard sided containers using a special soil blended for Kraft Gardens, using only the finest ingredients. The soil is checked daily by our growers for moisture content and fertilizer. This information is then programmed into a computer to deliver just the right amount of water and fertilizer. SM

*Amstel Mini's
ability to hold up better
than other ficus on interior
jobs makes it an easy
choice for industry
professionals.*

10" Amstel
Mini Braid

Care Instructions

LIGHT: 200 to 2000 ft candles, diffused light, near window.

WATER: Keep soil moist, do not let soil dry out. Water weekly as needed.

FERTILIZE: Fertilize three times a year using 2 tsp soluble 20-10-20 per gallon, along with 1 tsp magnesium sulfate and 1/4 tsp manganese sulfate.

TEMPERATURE: 62° - 80°F is ideal.

TRIM: Trim to maintain shape. Cut after leaf internode.

10", 12" container

Amstel King Braid
14", 17" container

Midnight Braid
8", 10", 14" container

Monique Braid 10",
12", 14", 17" container

Monique Corkscrew
14", 17" container

Amstel Mini Facts

AMSTEL MINI is a patented cultivar of Ficus Benjamina, though it resembles a miniature version of the Amstel King.

AMSTEL MINI is similar in look and habit to Amstel

King but its leaves are 1/2 the length.

AMSTEL MINI holds its foliage extremely well in the indoor environment, allowing it to qualify as a "Ficus of the Future"SM.
