WATER: It helps to occasionally dry down ivy but don't let it go too long or you will have lose of leaves.

FERTILIZE: Three or four times per year with a 20-20-20 water soluble fertilize.

TEMPERATURE: Ideal 60° to 75° Minimum 45°.

10" Algerian Ivy
Pyramid

Pyramids are cone-shaped plants that have been trained to grow on bamboo or steel tripod frames. This provides natural ventilation for the interior of the plant as well as allowing maximum available light to penetrate all sides.
