

Palm

King Maya™

- Low to high light
- Tolerant of dry conditions
- Bamboo-like multi-trunks of a *Seifrizii*
- Foliar elegance of a *Kentia*
- A new palm suitable for Interiorscapers

The Durability of a *Kentia* at a Fraction of the Cost

KING MAYA is a new indoor palm that provides an elegant look to any interior setting.

KING MAYA goes through a special growing process at Kraft Gardens. The finished result is a multi-trunk palm with a tall columnar appearance.

KING MAYA is a selected variety of *Chamaedorea Hooperiana*. Selective breeding eliminates all but the highest grade of young plants to become King Maya Palms.

KING MAYA has been known to out last *Kentia* in side-by-side comparisons on interior jobs

KING MAYA grows faster than *Kentia* Palms. This reduces costs for the grower, making it more affordable for the consumer.

Available Sizes

PALM KING MAYA™
10" Container 54" – 60"
14" Container 66" – 72"
17" Container 78" – 82"

KING MAYA is a recently identified (1992) palm species from Central America. *Maya* is a tightly suckering palm with slender, ringed, ivory-green stems bearing 5 – 6 leathery dark-green fronds per cane. Each frond is adorned with about 40 narrow, evenly-spaced pinnae, reaching an overall height of up to 14 feet at maturity.
